

Allflex **NextGen™ Tissue Sampling Technology**

The Allflex Tissue Sampling Unit (TSU) is an efficient and cost effective way for producers to use DNA for parentage verification, genetic selection and BVD diagnostics.

- Fast, high performance sample collection- A single-squeeze motion collects a sample with minimum distress to the animal
- Clean, uncontaminated sampling- The genetic material is sealed in a specially designed preservative
- Visual, DNA-sample identification- Instant confirmation of on-farm sampling success
- Minimize retesting- Tissue samples contain a large quantity of high quality DNA for genetic analysis yielding excellent lab results

065482	Tissue Sampling Unit (TSU)	Box of 100 Units
065484	Tissue Sampling Applicator	Each

AmerisourceBergen **Cast Padding**

- Latex-free
- Non-sterile
- Single use only
- 100% synthetic
- High-quality polyester

ITEM#	PRODUCT	SIZE	UNIT
065855	Cast Padding	2 in x 4 yd	Bag of 24 Rolls
065856	Cast Padding	3 in x 4 yd	Bag of 12 Rolls
065857	Cast Padding	4 in x 4 yd	Bag of 12 Rolls
065858	Cast Padding	6 in x 4 yd	Bag of 6 Rolls

AmerisourceBergen **Microscope Slides**

- Single use only
- Pre-cleaned
- 45 degree clipped corners
- Paper dividers in standard grade
- Available with plain or single frosted ends

ITEM#	PRODUCT	FINISH	SIZE	UNIT
065803	Micro Slides, Standard	Plain	25 mm x 75 mm x 1.0 mm	Box of 72 Slides
065804	Micro Slides, Standard	Frosted	25 mm x 75 mm x 1.0 mm	Box of 72 Slides
065805	Micro Slides, Premium	Plain	25 mm x 75 mm x 1.1 mm	Box of 72 Slides
065806	Micro Slides, Premium	Frosted	25 mm x 75 mm x 1.1 mm	Box of 72 Slides
065807	Micro Cover Slips	Super White Glass	22 mm x 22 mm	Box of 160 Covers

Boehringer Ingelvac MycoMAX™

Ingelvac MycoMAX has been shown to be effective for the vaccination of healthy pigs three weeks of age or older against *Mycoplasma hyorhinis* (Mhr). The duration of immunity is at least seven weeks following vaccination. See package insert for complete product details.

ITEM#	PRODUCT	UNIT
065936	Ingelvac MycoMAX™	50 Dose Vial
065934	Ingelvac MycoMAX™	250 Dose Vial

Boehringer Lockout™

Lockout aids in the prevention of new intramammary infections by providing a malleable barrier in the teat canal.

- Simulates the keratin plug, the cow's natural first line of defense, to seal the teat against bacteria
- Provides a sterile, antibiotic-free barrier between the udder and the environment
- Compatible with conventional dry-cow management practices
- Features a visible blue paste that's easy to distinguish from milk during removal
- Safe for use in non-lactating dairy cows and requires no milk or pre-slaughter withdrawal

ITEM#	PRODUCT	UNIT
065821	Lockout™	Pail of (144) 4 gram Single-Dose Syringes

MicroGen Vet MicroGen Vet DNA Diagnostic Testing Kit

MicroGen Vet DNA Diagnostic Testing Kit utilizes next generation sequencing (NSG) technology to determine exactly which microorganisms are present in infection sites; including respiratory, joint, bladder and uterine infections as well as in wounds. The kit provides tools to gather the sample and then send in an overnight delivery box to the testing laboratory with initial results in 24 hours and NGS details in three to five days.

- NGS extracts microbial DNA directly from the sample
- Samples are not easily effected by time or temperature
- 100% of microbes are identified with 99.9% accuracy
- All microbes and fungi are tested with one test and price
- Test detects seven known antibiotic resistance genes
- Each kits contains: (1) urine kit, (1) biohazard bag, (1) red wound swab, (1) 60 mL cup, (1) 2 mL vial, (1) lab requisition form and (1) shipping box
